## INTERIOR PREHUNG DOOR UNITS

These prehung door units are manufactured by Scotty's® in our own plant assuring the highest standards of quality.

Do-it-yourselfers, builders and architects agree that prehung door units save time and money. The rugged split jamb with integral stop permits easy, fast and secure installation. The door units are complete with clamshell casing already applied. Each casing joint is secured with a steel mitre joint fastener minimizing the possibility of opening mitre joints during handling and installation. The doors are pre-bored to allow easy installation of lock sets.

The Scotty's® prehung door unit presents a durable and permanent means to insure the satisfactory operation of interior hinged doors.

When ordering, be sure to specify right or left hand model and door width. The units are designed for the same opening height required for a standard 6'-8" door height.

Prehung units with lauan doors are available in stock at your nearest Scotty's® store.
